APPEAL TRANSFORMS
UTILITY INTO **ART**

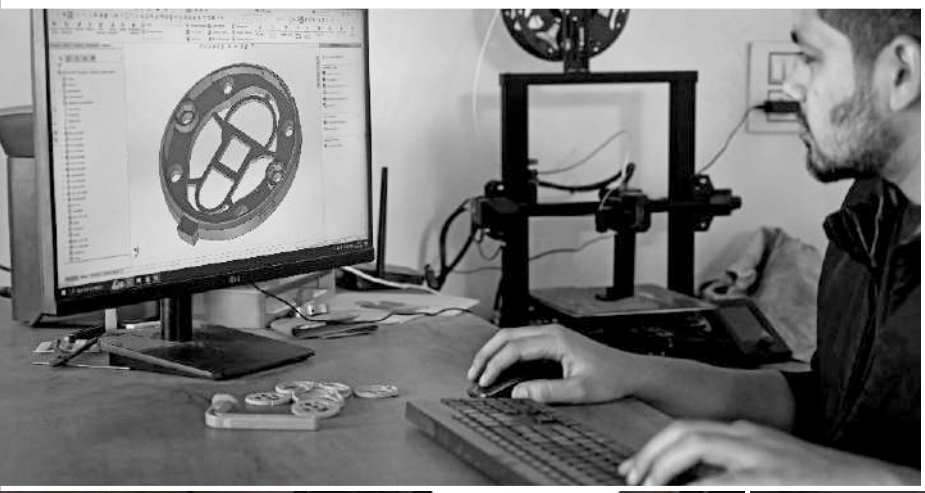

W.E.F. DATE : May, 2026

Established in 1976, we have consistently prioritized exceptional user experiences through a comprehensive portfolio of hardware products in diverse finishes. This includes a wide selection of hinges, tower bolts, furniture fittings, glass fittings, mortise handles, cabinet handles, knobs, cylinder lock bodies, and bath accessories. We remain committed to ongoing innovation and the development of new products that enhance both functionality and luxury within living spaces.

- Confirm availability of product/finish/quantity
- We are not responsible for delay and/or non availability of products/out of stock.
- Special finish/PVD finish may take time.

HINGE GENERAL INFORMATION

BENEFIT OF
Odd knuckle over Even knuckle

Even Knuckle Hinge

Odd Knuckle Hinge

GRAND HINGES

THRUST Bearing

In Grand Hinges the vertical load of the door is supported by streamlined vertical THRUST BALL BEARING assemblies. The vertical load bearing capacity of Grand Hinge has been substantially increased by use of through hardened chrome alloy ball.

LOCK WASHER HINGES

We pioneer & had an unparallel success in LOCK WASHER Life long maintenance free hinge since 1985. A unique concept of this hinge is that, stainless steel washers are inter-locked with the corresponding flap of hinge, so the entire wear & tear is between 316 stainless steel washers, resulting a long trouble free operation of valuable door attached with costly locks & night latches. LOCK WASHER is highly resistance to wear & tear, it doesn't allow the door to tilt, keeps the alignment of night latch intact.

LOCK® Washer

5 KNUCKLE HINGE

In five knuckle hinges, the pin usually rotates with the three knuckle leaf and rub against the two knuckle leaf i.e. two knuckle leaf distributes lateral wear over a much greater area. This reduce wear at any one spot & result in increased hinge life.

LUBRICATED LOCK WASHER HINGES

Wings is a series of LUBRICATED LOCK WASHER HINGES which is Manufactured only on Confirmed MOQ orders

LOCATIONS OF HINGES ON DOOR

Top hinge 5" - 7" from frame rabbet to top of barrel.

Bottom hinge 10" - 11" from bottom edge of barrel to finish floor.

Third Hinge centered between top & bottom hinges.

The weight & frequency of door determines, weather Butt Hinge, Rly. Hinge, Lock Washer Hinge or Bearing Hinges should be used. Heavy weight Doors should use Bearing Hinge, a door with high frequency should use Lock Washer Hinge.

LOCK WASHER HINGES

In 1985 we invented & mastered the art of making unmatchable washer hinges for high frequency doors.

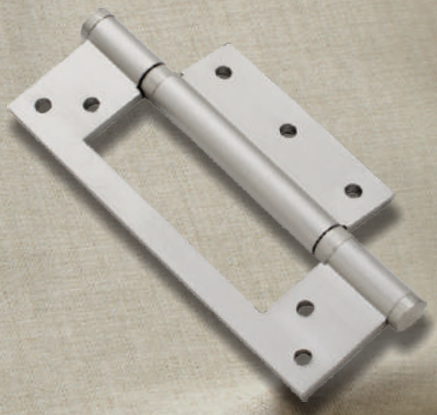

These hinges have immensely long life with perfect lifelong functioning.

More LIFE

H14 GRAND HINGES (BEARING HINGES)

SWING HINGE (FLUSH HINGE)

Swing Hinge (Flush Hinge) gives a very clean and consistent look as no space or gap is left between frame & the door. No corner is to be cut in the door on which they are installed. They are best suited for light weight Cabinets, Cupboards & Doors.

THRUST BEARING HINGES

A thrust bearing is a particular type of rotary rolling-element bearing. They permit rotation between parts, but they are designed to support a predominately axial load.

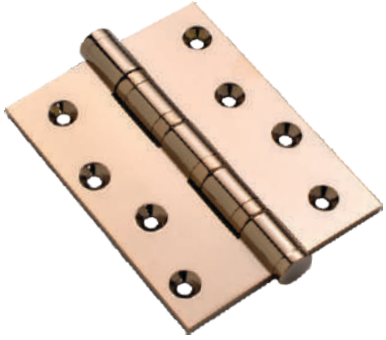

THRUST Bearing
