A new Journey Begins

COMPLETE

Complete speaks of a collection
of unique laminates
that are crafted to support
the new lifestyle of today.

With several unconventional ideas, iconic designs & distinctive concepts,
this line transcends pure comfort and brings in the blend of
convenience and flair as well.

Working towards a contemporary aesthetic, this collection
speaks of an unusual merger of subtlety & flamboyance.

CIRCLE OF LIFE

"It's the circle of life, and it moves us all, through
despair and hope, through faith and love, 'till we
find our place, on the path unwinding."

-Elton John, 'Circle Of Life'.

EYE

An eye is the first circle,
the horizon which it forms is the second,
and throughout nature this primary
figure is repeated without end.

Perhaps nothing appears more perfectly spherical than the gaseous ball of fire we see in the sky every day. Gravitational forces pull matter toward the center of mass, making most of the objects in the solar system, like the sun, settle on a spherical plane.

As stars, planets and moons spin on their axes, centrifugal force causes these objects to bulge at their equators, making them wider than they are tall.

The faster an object spins, the more oblate than truly spherical it becomes.

ALL OF
NATURE

The world as we have created
it is a process of our thinking.
It cannot be changed without
changing our thinking.

– Albert Einstein

CHANGING TIMES
REQUIRE A CHANGE IN
THINKING & ACTION.

Throughout our journey as a
company, we have changed and will
continue to change, but our roots, our
ethics and our core will always remain
the same.

The tree is a symbol of a constant yearning for greatness and
growth firmly rooted in stability and wisdom.

The golden tree with its every branch and leaf reaching for
the heavens, indeed its very being striving for exaltation, is
the perfect symbol of our company's highest aspirations and
ideals.

Green is a color that can evoke powerful emotions. It is a dominant color in nature that makes you think of growth. Think of nature and see the incredible variety of shades of green expressing renewal and life. Green evokes a feeling of abundance and is associated with refreshment and peace, rest and security.

BLEND

How lovely yellow is!
It stands for the sun.
Vincent Van Gogh,
Dutch Post-Impressionist
painter, 1853-1890.

Red is the color of extremes. It's the color of passion, seduction, danger, anger, and adventure. Our prehistoric ancestors saw red as the color of fire and blood – energy and primal life forces – and most of red's symbolism today arises from its powerful associations in the past.

HORIZONTAL

Style is a way to say who you are without having to speak.

Horizontal lines are used to create a strong sense of tranquillity and calm. Horizontal lines give the impression of stability because of their relation to the horizon and the ground that we stand on. When you combine that with a material known for its strength.
