Interesting Facts about PVC

Discovery
PVC was accidentally discovered, not one but twice! It was first stumbled upon in 1835 by the French chemist, Henri Victor Regnault and then it was rediscovered by the German, Eugen Baumann in 1872.

Structure
PVC is a white, brittle solid but it can be more flexible when plasticised.

Durability
A recent study by the European Council of Vinyl Manufacturers (ECVM) demonstrated that PVC can last up to 70 years in some cases - providing reliable service throughout its entire lifespan.

Recyclable
Like all thermoplastic, PVC is ripe for recycling. PVCu can be reshaped at very high temperatures; giving it great recycling possibilities.
