Innovation for total VISION™

Ozone continues with the concept of 'Total Vision' to create transparent & elegant commercial spaces. Every fitting in our Architectural Glass Hardware range is designed to meet the concept of ‘Total Vision’.

Ozone is a young, dynamic company offering Architectural Hardware & Security Solutions through a wide range of standard and customized products. A solution-centric approach has enabled Ozone to grow from a startup to one of the leading brands in the Architectural Hardware Industry. Globally, the Company has made its footprint by supplying goods to almost 40+ countries. With a Global Perspective in mind right from its inception, the Company has ensured each product has the quality and certifications so that they can be offered to all markets.

Manufacturing Capabilities

Our state-of-the-art Manufacturing Facilities backed by design capability enable us to provide other OEM services in India and Overseas. We can offer Stainless Steel OEM services for manufacturing of Casted, Machine Turning, & Sheet Metal Components in all grades of Stainless Steel and other metals.

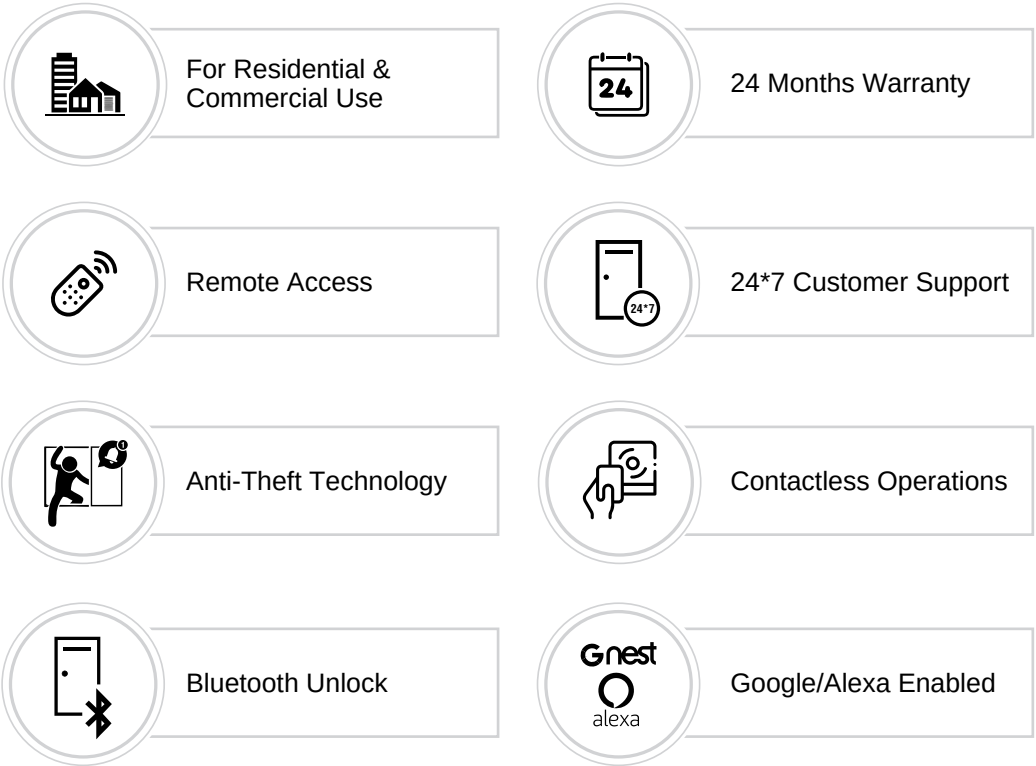
About Ozone

Everything starts with a purpose. We did too. Ozone – For a Safer World.

Two decades later, with a larger team and business verticals, we have successfully ventured into Safety, Security, and Hardware solutions – for Residential and Commercial establishments.

Ozone offers new-age Security Solutions consisting of Digital Locks, Digital Safes, & IoT-based products suitable for Homes, Offices, Hospitals, Hotels & Other Commercial Establishments.

The range offers convenience and familiarity to the users through multi-authentication modes, i.e., Fingerprints, User Passwords, RFID Cards, Emergency keys, and a user-friendly app.



Our Product Range

For over two decades, Ozone has offered Architectural Hardware & Security Solutions with a diversified portfolio of more than 5000 products. These products are tested and certified internationally for quality, functionality, and performance.

SAFES & LOCKS

Our range of Next Generation Video Door Phones, Smart Cameras & Doorbells come with a pre-installed rotation base that enables 360 degrees view of the area.

Additionally, Infrared LED illuminators enable night vision to the camera for the perfect night vision and are accessible through Google Nest and Alexa Voice assistant for a convenient approach.

ACCESS RIGHTS

A new perspective on home security, the range allows you to control multi-dimensional aspects of your home through Biometric fingerprints, a simple Password, RFID card, or a user-friendly App 'OzoLife' that enables operating the lock from a remote location; as per your specific lifestyle and at the leisure of your convenience.

ADMIN

The feature allows the Admin to create new admins, modify or delete the right of an existing admin and regular users, and perform various activities of regular and Admin users' accounts, including but not limited to resetting the product, accessing the settings and logs of the device.

USER

Regular users can access the product through pre-defined access modes. However, they cannot perform the rights of an Admin, such as adding or deleting users, resetting the product, etc.

GUEST RIGHTS

Guest users can access the product through the One-Time generated Password. The password is valid for a certain period and cannot be reused by the guest(s).

ALARM

LOW BATTERY ALARM

The device triggers an alarm if the battery comes below a predefined voltage threshold of 4.8V reminding users to replace batteries days prior to the estimated discharged period.

DOOR ENGAGED ALARM

The device will trigger the alarm if the deadbolt is not properly engaged and the door remains open.

BREAK-IN ALARM

The devices will trigger the alarm and alert the user if there's an attempted break-in.

AUTO SECURE ALARM

The device will activate the alarm and disable the keypad on consecutive incorrect authentication attempts for a specified amount of time.

LOCKING MODES

Every lock has two main functions – closing the door through a latch and locking the door through a deadbolt. Ozone's range of digital door locks brings additional security through a host of locking modes for different types of users.

AUTO LOCKING MODE

This mode makes sure the door gets locked automatically within 3-15 seconds after it closes as per user defined instruction.

PRIVACY LOCKING MODE

The Privacy Mode can be used to restrict access to your home. Once it is activated the door cannot be opened by any other user. Only the Admin and the Emergency Key can open it.

PASSAGE MODE

Passage Mode enables manual locking in areas which does not require locking everytime it is accessed, so that the door does not get locked every time it shuts and gives user the convenience of opening lock without authentication.

SMART FEATURES

- Dual Combination Mode
- Audit Trail
- Child Safety Button
- Smart Freeze
- Anti-theft Password
- USB Port for Emergency Power Backup

Furniture Locks

- Password/Fingerprint & Key Lock
- RFID Card, Fingerprint & Password Lock

A Keyless way to Secure Your Valuables

Not only doors, but we also offer a range of Digital Furniture Locks that can be operated via password, biometric, fingerprint, or both, eliminating the need to carry a bunch of keys everywhere.

You can access these locks using your finger. These locks can be installed in all hinged and pull-out drawers.

Additionally, they can be operated via biometric, RFID card or a simple password or a hassle-free mode of access on the go.
